

TARRA

GRIPPER FOR HOLLAND PROFILES

TARRA is light and handy tool for attaching e.g. a chain block quickly to a holland profile without need to weld an eye piece. Gripping is based on wedging effect, which causes TARRA to clamp firmly on the Holland profile under pull from the eye.

It is not allowed to use TARRA in lifting applications.

Due to the innovative design and the special material the safety factor against break is five. Three standard sizes of TARRA are available.

Technical data	Tarra 1,5	Tarra 3,0	Tarra 5,0
Safe working load	15 kN (1,5 t)	30 kN (3,0 t)	50 kN (5,0 t)
Size of Holland profile	100 - 160 mm	100 - 260 mm	200 - 430 mm
Weight	2,6 kg	4,1 kg	6,0 kg
